## SX PERFORMANCE NOW OFFERS ITS HIGH-PERFORMANCE AUTOMOTIVE PRODUCTS AND SERVICES TO A LARGER NETWORK OF DISTRIBUTORS

SAINT LOUIS, MO (August 15, 2005) — In an effort to better serve our customers and improve the advancement of the SX Performance' line of pumps, regulators, filters and fittings, we have expanded our customer service and sales to a larger network of premiere distributors direct from our Aerospace and Defense manufacturing facility in Saint Louis, Missouri.

Fluid Control Products, Inc. (FCP), previously the exclusive distributor of SX Performance, will no longer promote, distribute or service our product lines effective 01 August 2005. Currently, FCP has a limited stock remaining and is authorized to sell until depleted.

Effective immediately, SX Performance will sell and service our products directly to a select group of distributors who will then supply the Jobbers and/or end-users. We are in the process of selecting and establishing premiere distributors. Once that process is established, we will inform you of the best method of procuring SX Performance products. Until then, if any questions or concerns arise, contact Jeff Jensen directly at (314) 644-3000.

Be on the lookout for our award winning products and new product advancements in your local speed shop very soon.

From our production line to the finish line, we're building an exciting new line of winning performance products and distributors. See you in the winner's circle.
